MONTANA STATE UNIVERSITY

DEPARTMENT OF HEALTH, PHYSICAL EDUCATION AND RECREATION

Fall 1978

PLEASE RETURN

Editor - Gary Evans

FROM THE DEPARTMENT HEAD'S DESK

I hope all is well with each of you and that you are enjoying a good school year. Things are going quite well at Montana State, the Department seems to continue to grow and change. We have several new faculty which will be mentioned later in the Newsletter. Last year Dorothy Kennemer and Ann Seibel retired. We miss both of these ladies, as both contributed a great deal to this Department.

Dorothy received the honor award from the MAPPER which was a credit to her for all that she had done for Physical Education in Montana. I am especially appreciative of having had the opportunity to work with her in this Department.

Don Morris and Tchang Chung left last summer, Don went to Cal Poly at Pomona and Tchang went back to school to work on his doctorate. We certainly miss both of these individuals as both contributed a great deal to our program. Don had been directing a grant funded by the Bureau of Education Handicapped and had done a very excellent job in organizing and carrying out the grant as well as his other duties. He also had done a very excellent job of organizing the setting up of an elementary physical education program for the Department. Dr. Craig Stewart was hired to carry out the duties in the grant and seems to have things well organized and underway.

We are planning some new facilities once again. We have six handball courts and six tennis courts which are under construction. We are planning to put tartan or some polyurethane surface on the floor of the Fieldhouse when funds are available. The Fieldhouse has a tremendous potential for a variety of activities once we cover up the dirt. However, the main problem is with the rodeo. We are still looking for some alternative such as a new building either on campus or in conjunction with the city-county which would be at the Gallatin County Fairgrounds.

Last year I mentioned that we were working on our Role and Scope Report which turned out to be a rather large booklet attempting to explain what we are doing and planning to do. I thought we were treated rather well, our role fit the mission of Montana State University.

It was nice seeing a lot of our former graduates at the MAPPER Convention. This meeting gives us a chance to renew old acquaintances and find out how things are going for you. Have a good year and if you get to campus, please stop and see us.

Best wishes,

George Shroyer

GRADUATE ALUMNI NEWS

Recent Master's Degree students accepting new appointments were:
Nancy Colton, instructor of Physical Education at Montana State University;
Karen Shirer, instructor of Physical Education at Montana State University;
Tom Schumacher, teacher and coach at Malta High School, Malta, Montana;
Dan Ryan, recreation director and swimming pool manager, Glendive, Montana;
Jan Rintala, teacher and coach Polson High School, Polson, Montana.

Returning to former positions at the conclusion of their graduate work were:
Sonny Lubick, head football coach at Montana State University;
Howard Ross, assistant football coach at Montana State University'
Erma Casagranda, full-time mother and wife in Bozeman; and
Tom Lindskog, assistant intramural coordinator at Montana State University.

Paul Sorenson has been appointed Superintendent of Schools in Denton, Montana.

Rick Dieterich has been appointed physical education teacher and assistant football coach at Malta High School, Malta, Montana. Rick also organizes and supervises one of the most comprehensive and enthusiastic intramural programs in Montana.

Dr. Chuck Hundley was the first Master's Degree recipient in P.E. from MSU. He recently assumed the position of Executive Director of the Montana Foundation for Medical Care in Helena, Montana. He was formerly the Chairman of Allied Health Sciences at Wichita State University.

Frank Kohlenstein was moved up to the Department Chairman of P.E. at Lewis Junior High School in Valpariso, Florida. He is also a football coach.

Dick Watson is still at Mulkiteo High School in Everett, Washington. He is Department Chairman and supervises and runs an extensive sailboat and canoeing unit for their physical education program. They are lucky to have a beautiful lake and school-owned sailboats and canoes right adjacent to the campus. Dick visited us recently and it was good to see him again.

Larry Tocci has interrupted his graduate work to accept a position at Three Forks High School as a teacher and coach. He is planning to complete his Master's thesis next summer.

Barbara Scheede and Carl Pearson were recently married and she is adjusting to the new role of wife and mom to Carl's children. Barbara is still working on her thesis and should complete it this year.

Priscilla Robinson is now a full-time wife and is also trying to complete her research project. She and her husband have purchased a new trailer and placed it on their land in Belgrade.

Larry Martin and his wife are now living in Bozeman. Larry is working with the campus Intramural and Recreation Department.

Dave Oberly assumed the Presidency of our state association at the MAHPER Convention in Helena. He is also very busy as the Convention Manager for the Northwest District Convention to be held in Billings next spring.

Chuck Hundley and his wife, Candace, presented a session at our MAHPER convention on October 19, 1978. Their presentation was on "Coping with Stress."

Dee Anna Stalnaker conducted a session "From Handgames to Jazz" at the same MAHPER convention. It was nice to visit with Dee Anna and Tom Kelly who are both instructors at Carroll College. Tom is still the Athletic Director at Carroll College and looks very trim and fit.

Dave "Buzz" Oatman is the proud father of a baby girl, Jamie Lynn. He is still a coach and teacher of physical education in Billings, Missouri. Dave reports they have really expanded their lifetime sports program and the kids are accepting it with enthusiasm.

Bill and Mary Ann Strothman are the parents of a baby boy, Steven Michael, born on Nov. 14, 1978. They live in Lolo, Montana. Congratulations!

Jerry Nuzzolo is still a counselor for the Youth Commission in Denham, Mass. He is enjoying his work and has recently written a grant proposal which, if funded, will enable him to become the director of a new program. Jerry visited our campus recently and it was good to see him again.

ALUMNI NEWS

Recent graduates from MSU accepting new employment were:
Jeff Jarvi, teacher of elementary PE in Vero Beach, Florida;
Mitzi Nuber, physical education teacher, coach and drill team advisor at Shelley Junior High School, Shelley, Idaho;
Steve Larson, teacher and coach at Thermopolis High School, Thermopolis, Wyoming;
Tim Warner, teacher and coach at Donnybrook, North Dakota;
Dee Barfnecht, teacher and coach at Augusta High School, Augusta, Montana;
Sheree Jansen, elementary specialist in Kesler School District, Helena, Montana;
Bryan Knight, tennis coach at Montana State University;
Keith Kirscher, physical education teacher and basketball coach at Plevna, Montana;
Bill Anderson, teacher and coach at Melstone, Montana;
Kay Collins, teacher and coach at Deer Lodge Junior High School, Deer Lodge, Montana;
Jan Bignell, elementary P.E. teacher at Bryan Elementary School, Helena, Montana.

NOTES OF INTEREST ABOUT FACULTY MEMBERS

Glen Norris, elementary physical education specialist and Barbara Miller, adapted specialist, were part of the OSPI team which presented workshops at several Montana cities this fall. The workshops were part of local school district orientation sessions. They also presented sessions at the MAHPER convention on October 19-20 in Helena. "Using Stations in Elementary Physical Education" was the topic of Professor Norris' presentation. Barbara's session was titled "What Mainstreaming Means to Physical Education."

Bob Schwarzkopf sat at the foot of the legendary "Aerobics" Cooper while attending a workshop at the Dallas, Texas Aerobics Institute. He has been busy with several speaking and teaching engagements. He taught an exercise physiology seminar for MSU's WAHI students and was a guest faculty member at Carroll College for their first annual Sports Medicine Seminar.

Gary Evans was elected Vice-President for physical education for the Northwest District of AAHPER at the annual spring convention in Spokane, Washington. He will serve a two-year term and be responsible for planning the physical education sections at the April 1979 Northwest District Convention in Billings, Montana and the April 1980 Northwest District Convention in Portland, Oregon. He has been appointed Northwest District Liaison to the National Association for Sport and Physical Education and will attend the NASPE sectional during the AAHPER Convention in New Orleans in March 1979.

Oral Behunin has contracted with the Montana Health Systems Agency to complete a Health Education Inventory in the state of Montana. The survey will include who offers Health Education, who receives Health Education and how effective the education is. The survey will be completed by March 1, 1979 and will reveal what is going on in Health Education in Montana. He has also recently been re-certified in CPR by attending the American Heart Association and Red Cross Certification Program in Helena.

Craig Stewart attended a national Bureau of Educational Handicapped workshop in Boston during the first week in November. Barbara Miller, Glen Morris and he also attended Project INFUSE Symposium in Boulder, Colorado, November 15-18, 1978. The purpose of the symposium was to identify methods and techniques of incorporating information about handicapping conditions into the general physical education curriculum.

Marga Mosaeus, Bette Lowery and Ellen Kreighbaum attended the Western Society for Physical Education of College Women Convention held at Asylomar, California during the weekend of November 16-19. Ellen and Bette also spent three weeks touring the Soviet Union last spring. Their trip was sponsored by the MSU Focus on Women and they visited several cities and had an opportunity to see schools and sports facilities in the USSR.

George Shroyer published an article in the March 1978 issue of the Physical Educator magazine. He will also have an article pertaining to administrative change that will be published in "Insight" magazine next spring. "Insight" is a school administrator's magazine. He arbitrated a grievance between a teacher and School District #6 in Columbia Falls, Montana and also, arbitrated another grievance between a teacher and School District #38, Big Fork, Montana. He has been appointed to a task force to evaluate the Great Falls Public Schools. Dr. Shroyer's task will be to evaluate the school buildings and facilities to see if they meet the needs ot the students including the handicapped and make recommendations to the Board of Education.

Bill Serdahely has been funded to do research as part of his assignment at MSU. He recently attended a Drug Prevention Education Program in San Diego, California in October.

Karen and Curt Shirer are the parents of a new baby daughter, Kelly, born the first week of November. Kelly checked in at 5 pounds 12 ounces and has changed life considerably in the Shirer home.

During the 1977-78 school year, Ellen Kreighbaum was on a sabbatical leave from the University to collect data and write two textbooks. The first is a text on Biomechanics for the Teacher and Coach: A Qualitative Approach. It is being published by Burgess and should be out in January 1980. The book is being co-authored by Dr. Katharine Barthels of Cal Poly, San Luis Obispo, California.

The second book is on the mechanics of gymnastics skills. Ellen traveled down to Fullerton, California in the fall of 1977 to talk with and film the coaches and men's and women's gymnastics teams from California State University, Fullerton. As some of you may know, the Cal State men's team placed 5th in the nation and the women's team placed second in their respective national tournaments. Interesting film data were collected on two of the top vaulters in the country, Carolyn Burdick and Sammy White, which Ellen presented at the International Congress of Sport Sciences, Edmonton, Alberta, Canada in July. Many of the international coaches were in attendance since the congress preceded the Commonwealth Games.

A second paper was presented entitled "Morton's Foot Syndrome and Its Relationship to Leg Stress in Runners." The data for the paper was collected by Gloria Ferrandino, a 1976-77 graduate student who attended MSU for a Master's Degree.

In August, Ellen was invited to present a paper to the American Podiatry Association at their National Convention in Portland, Oregon. The podiatry association is forming a sports medicine group and scheduled several sessions on leg and foot problems of runners, joggers and athletes. Although Ellen enjoyed the year away from the routine, she says that she learned two things from the experience. "One can never write down as much as they say when they're talking," and "a teacher really needs the students to be a creative and good thinker."

FACULTY RETIREMENTS

Ann Seibel retired from her position as Associate Professor of health education at MSU at the end of last year. She and her husband Bob, also a retired MSU professor, have moved to Sedona, Arizona where they have built their beautiful retirement home. They enjoy Arizona very much and reportedly like everything about retirement life in Sedona.

Miss K. Retires - Dorothy Kennemer, known to most of her past students as Miss K., retired at the end of the 1977-78 academic year. Her advisees feted her at a surprise party, and the faculty had a riotous banquet honoring Miss K. and Ann Seibel.

Miss K. came to Montana State College in 1949 after receiving her Master's Degree at Washington State College. Her undergraduate work was done at Southwest Missouri State University. She taught at Eldon, Mo. for one year and then accepted a teaching position in Concordia, Kansas, where she remained for two years. Her work with the American Red Cross strengthened her background in aquatics and all phases of swimming remained a strong area throughout her teaching career.

The Dolphins, a synchronized swimming club, were an outgrowth of Miss K.'s interest in aquatics. Nineteen years of public performances in the small pool in Romney Gym did much to publicize the department and it was a favorite event for students and faculty across campus. She was a hard task master which resulted in excellence on the part of her swimmers. The small balcony became so crowded with spectators that the engineers in the Physical Plant were consulted as to the load limit of the balcony.

Folk dancing was her second love. She spent several summers attending various workshops in order to stay abreast of new methods and bring back more dances to her classes. Her enthusiasm infected even the most reluctant students.

She taught many other classes in the activity program including archery, softball and volleyball. Her classes in Recreation Leadership afforded students their first opportunity to work with youngsters in a laboratory situation. Her classes in Camp Leadership were a great success despite Bozeman's inclement weather in the spring. The traditional overnight afforded many students their first experience in sleeping out-of-doors, cooking over a campfire and cooperative living in an outdoor situation.

"Memories are made of things like these!"

NEW FACULTY MEMBERS

Steve Harmon is a new assistant professor of health education in our department. He is teaching several health courses this year including: personal health; drugs, alcohol and tobacco; and sex education. Steve came to us from Southern Utah State College in Cedar City, Utah where he was a professor for five years. He was awarded the professor of the year award at SUSC in 1977. At SUSC he was co-director of the human resources program and obtained grants with state and federal agencies for drug abuse prevention. He holds Bachelor's and PhD degrees from the University of Utah in Salt Lake City, Utah where he was awarded an ADEA Title IV Fellowship while working on his PhD. He has also attended Westminster College and California State University at Hayward. Steve is married and the father of three sons; Paul, Adam and Andrew. His wife, Marsha, gave birth to Andrew since their arrival in Bozeman. He is an avid fly-fisherman and enjoys tying flies, storytelling, travel, cross-country skiing, running and handball.

Craig Stewart is the new director of our Bureau of Education for the Handicapped grant. He will be responsible for directing all activities, projects and training services associated with it. He will also teach adapted P.E. classes at the undergraduate and graduate level. Craig is a native Texan and his home town is Austin. He received B.S., M.A. and EdD degrees from the University of Texas in Austin where he specialized in adapted physical education. He has taught four years in special education and adapted physical education in the Austin Public Schools. He was a teaching assistant and instructor of P.E. for the handicapped at the University of Texas prior to coming to MSU. He and his wife Janis are parents of two children, Chad and Tracy. Craig is a loyal Dallas Cowboy fan, enjoys sports, bridge and backgammon.

Greg Olson is a new instructor of martial arts and aquatics in our department. He was formerly a graduate teaching assistant at MSU in 1975, when he received his M.S. in P.E. He received his B.S. in P.E. from the University of Minnesota, Duluth and has attended Kyonggi College in Seoul, Korea and Hombu Aikido, Tokyo, Japan. Greg is a third degree black belt in judo, a second degree brown belt in aikido, a professional association diving instructor and has taught at the Duluth YMCA, Lincoln Junior High School and the Practical American Conversation Center in Tokyo. He is married and enjoys amateur photography.

FACULTY RESIGNATIONS

Don Morris resigned from MSU at the end of summer quarter 1978 to accept a position at California Polytechnic University, Pomona, California. During his four years at MSU, Don designed and revised our elementary physical education preparation program and was the first director for the Bureau of Education Handicapped Grant in Montana. Through the many workshops and lectures he conducted around the state, Don Morris has made a great contribution to physical education and young people. He has probably influenced more Montana P.E. teachers styles and methods than any other person. Don reports that all is well in southern California. Don assumed a position as Associate Professor of Physical Education at Cal Poly. His responsibilities are in the area of adapted physical education where he has completed the writing of a project grant proposal which was submitted to the federal government. In addition to teaching, his other major efforts are being devoted to the establishment of an on-campus motor development clinic to serve the needs of handicapped children in the region. Our loss is California's gain, Good Luck, Don!

Tchang Bok Chung also resigned his position as instructor of martial arts and swimming to return to full-time study on his doctorate. Tchang is presently a graduate teaching assistant at Columbia University where he is specializing in the Psychology of Sport.

NEW GRADUATE TEACHING ASSISTANTS AND GRADUATE STUDENTS

We have twenty-three full-time graduate students and several part-time graduate students working towards graduate degrees this year. Five of them are teaching assistants in our activity classes, five of them are teaching elementary physical education at five different Bozeman Elementary Schools, two of them are intramural assistants, two of them are adapted teaching assistants, two of them are assistant athletic trainers, and one is an assistant in the outdoor recreation center. We also have some assistant coaches in the women's athletic program.

Bill McAlduff is from Lexington, Massachusetts and graduated from the University of Vermont in Burlington, Vermont. He majored in physical education and played University Division I level hockey four years and baseball two years at Vermont. He has been an instructor in the summer baseball school at Vermont. Bill is very interested in athletic administration, coaching hockey and baseball and enjoys racquetball and motion picture making.

Ron Farris received his B.S. degree from the University of Montana in Missoula. He is a native Montanan and his home town is Anaconda. He is married and has one child. He is at MSU on a leave of absence from the Anaconda School System where he has been the Activities Coordinator for the past four years.

Jo Buysse is from Marshall, Minnesota and graduated from Southwest Minnesota State University, her home town. She was a member of the women's basketball and volleyball teams in college for four years. She was listed in "Who's Who in American College Students" in 1976. For the last two years, Jo has taught at Lake of the Woods Schools in Baudette, Minnesota. She taught grades 1, 2, 7-10 physical education, grades 7 and 10 health education and coached varsity volleyball, basketball and track.

Terry Martian comes to MSU from West Chester, Pennsylvania where she received her B.S. degree in physical education at West Chester State College. She is married and her hometown is Langhorne, Pennsylvania. Terry has studied at MSU before, as she was an exchange student here a couple of years ago. She was a member of the women's varsity basketball team two years in college. She is interested in outdoor recreation. She has been a Junior High School basketball coach for one year and a field hockey coach for one year.

Kim Keller is from St. Louis, Missouri and graduated from Southwest Missouri State University in Springfield, Missouri. She majored in physical education and was a girl's tennis coach for one year at the high school level. She graduated Cum Laude in college and participated on the women's tennis team. Her interests are tennis, racquetball, water skiing, macrame, camping and cycling.

Pat Kemp is originally from Chippewa Falls, Wisconsin and received her B.S. degree in physical education from the University of Wisconsin, River Falls. She graduated with senior honors and has three years teaching experience at the high school level and seventh grade. She has coached gymnastics and track. Pat enjoys cross-country skiing, swimming, bicycling and backpacking.

Janice Flood received her bachelor's degree in physical education from Skidmore College, Saratoga Springs, New York. She is married and her home town is Branford, Connecticut. Jan participated in women's varsity basketball, softball and field hockey. She has taught two years at the 7th and 8th grade level and coached field hockey, basketball, softball and co-ed tennis.

Jeff Carroll has attended Oregon State University and graduated Cum Laude from MSU in June 1978. He majored in K-12 physical education. He is from Billings, MT where he was all-city basketball and football, all-conference and all-state football in high school. He won the 440-yard dash in the Meet of Champions in track. He was a member of the Honor Society and was a senior counselor. In college he has been a member of the MSU track team. Jeff has coached 7th and 8th grade basketball in Bozeman and 7th, 8th and 9th grade football. He enjoys handball, running and cross-country skiing. Jeff is an elementary P.E. specialist at Emerson School and teaches K-4 P.E.

Sue Paul is an elementary physical education teaching assistant with the Bozeman Public Schools. She teaches K-4 physical education at Irving Elementary School. Susan is from Great Falls, Montana and graduated from MSU. She received the Harrison Award which is an award for outstanding contributions by graduating senior women. She has taught elementary P.E. previously at Irving School and enjoys outdoor recreation, photography and crafts.

Steve Wheeler is also an elementary physical education teaching assistant with the Bozeman Schools. He teaches K-4 elementary P.E. at Longfellow School. Steve is from Almond, New York and graduated from State University of New York at Cortland. He received an Alumni Scholarship while in college and has coached the Corning East Track Team and has been a cross-country ski instructor and winter survival instructor at Cortland State winter camp, Racquette Lake, New York.

Kathleen Sorensen is from Columbia Falls, MT. She received her B.S. degree in physical education from Northern Montana College in Havre. She has taught elementary physical education at Sunnyside School in Havre for two years. Kathleen enjoys running, bicycling, hiking, backpacking, sewing and bread baking.

Steve Kracher is a graduate assistant football coach and graduate assistant intramural coordinator. He is from Columbia Falls, MT and graduated from MSU in 1977. He majored in physical education and has been a teacher and coach at Malta High School, Malta, MT for one year. He was named to the Associated Press and Kodak All-American Football Team in 1975. He was All-Big Sky Conference in football in 1974 and 1975 and was drafted by the Minnesota Vikings in the 11th round in 1976. Steve enjoys tennis, golf, hiking, skiing, photography, drawing and all sports.

Chris Dover has returned to the United States after teaching in Australia for three and a half years. She taught grades 7 through 10 while in Australia at Blackburn South High School in Victoria. She had an opportunity to travel quite extensively and really got to know the country. She is married and her husband is also a teacher and taught in Australia with her. Chris is a former graduate of MSU and majored in physical education. She has coached swimming, cross-country, basketball, softball and track. She enjoys skin diving, backpacking, skiing and photography. She is really interested in outdoor recreation. At MSU this year, Chris is a teaching assistant in the MSU Outdoor Recreation Center and will conduct clinics and overnight trips of all kinds, including camping, skiing, cross-country skiing, rafting, sight-seeing, photography seminars, orienteering seminars and geology field trips.

Chris Bigelow is an assistant women's volleyball coach at MSU this year. She is working with Head Coach Bill Neville in upgrading MSU's program. She is from Chelan, Washington and graduated from Eastern Washington University with a major in physical education. Chris was a northwest USVAA "all-star" in 1973 and 1974 and a member of the USA women's volleyball training squad in 1974. She has taught P.E. and Health in high school in Portland, Oregon for three years and has coached volleyball, basketball and tennis at the high school level. Chris enjoys back-packing and antiques.

Les Dalmata is from Gloversville, New York and graduated from the State University of New York at Utica. He has also attended Michigan Tech and Fulton-Montgomery Community College. He is married. He served three years as an aquatic director in a YMCA. He has coached a AAU-YMCA swim team for three years.

Jean Myllamaki is from Stevensville, MT and received her B.S. degree in physical education from MSU. She did her student teaching in Scotland. Jean is married and is an elementary physical education instructor in grades K-4 at Hawthorne Elementary School. Jean enjoys skiing, hiking, horseback riding, sewing, drawing and sketching.

BOWLING INSTRUCTOR'S WORKSHOP

On December 11th and 12th, 1978, the National Bowling Council will conduct a two-day workshop on how to improve the teaching of bowling. The clinician will be Bill Bunetta, NBC Master Clinician. He has conducted hundreds of similar workshops all over the country, but this is his first in Montana. The clinic will run from 9:00 a.m. - 12 noon and 2:00 p.m. - 4:00 p.m. both days at the bowling alleys in the MSU Student Union Building.

The workshop director is Dr. Gary F. Evans, professor of P.E. at MSU and is sponsored by the National Bowling Council, the HPER Department at MSU and the OSPI. Anyone interested should register for this free clinic by completing the registration form on the bottom of this page and returning it to the HPER Department, MSU.

MSU INTRAMURAL PROGRAM participation hits over 12,000 students over fall, winter and spring quarters, 1977-78. With over 250 softball teams and 4,000 participants in men's, women's and co-ed softball alone - intramural participants showed another great increase. Spring quarter indicated 5,541 students involved in thirteen different activities, bringing the total participation number to 12,015 students for the 1977-78 school year. This figure as compared to the 1976-77 year, indicates 2,217 more participants this year for a 22.6% increase for 1977-78!

Several new sports were added to intramural activities to contribute to the participation increase. Existing clubs greatly helped in archery, judo and fencing to make it possible for these activities to be added to the intramural lineup. Soccer was the biggest addition to intramural action and was one of the most successful activities based on player's satisfaction. The 50-Mile Club was initiated during spring quarter and was an instant success with 61 women and 40 men running in the club. Weight lifting also was an activity addition this spring and will be added to next year's lineup of activities.

Several existing activities showed a great increase this year to also boost the participation level. In team sports, basketball and water basketball increased in numbers plus the stupendous increase in softball added to the program participating numbers. Racquetball at MSU joins the national trend of popularity, and tournaments in racquetball almost doubled in numbers. Skiing and cross-country running showed a 25% increase. Intramural sports at MSU is really in a period of growth.

CHRISTMAS '77 MAIL BAG

Pat Miller Green Gailey and her husband have built a new home in Mountain Home, Idaho and are in the well-drilling business as well as raising cattle. Their children have varied interests as evidenced by the following: Jim graduated from Stanford in creative writing, Dave finished his master's in Soils at Minnesota, Dan is majoring in classical guitar at Boise State, and Nancy is interested in Veterinary Science. How does she keep track of them?!

Mary Bunn Johnson Billehus reminds me that it has been twenty years since she taught dance on campus immediately after her graduation. Now she has daughter Laure Bunn attending Denver University on a music scholarship and Georgia, a sophomore, very much in love with horses. Mary Bunn plays golf in the summer and racquetball in the winter.

Ardy and Jim McLeod and their boys comprise one of the most active families on record. Ardy's team won the city championship in gymnastics, she skis and swims as time permits and plays bridge at any time. Jim was nominated for National Coach of the Year after winning eight state championships in track and being named Coach of the Year for the fourth time, and also coaching this year's AA State Champion Football team. He also spots in the press box for the NBC-producer for all Bronco home games. Their boys are 19, 17, and 15 and I don't dare even start on all their activities!

Kay Perlinski Ashcraft and her husband have been deeply engrossed in finishing their basement. Five-year-old Jennifer has started kindergarten while Becky is still very busy at home cleaning out all cupboards and drawers. The third baby was due in June so you will have to wait until next year's installment to hear about that one.

Sonja Larson Dehn and her family find happiness in both music and all the active sports with which they fill their lives. They have two boys and a girl, all very active.

Deloris Siverts Anderson is still hitting tennis balls and volleyballs but admits that she has slowed down a little. Their daughter is in forestry school in Oregon and son Mark is now a freshman in electrical engineering and computer science. He was No. 1 in his Senior Class of 500!

Faye Prevost Wood and family had a year filled with travel, culminating with Faye's trip to Europe. In four weeks, she and a friend visited Denmark, Sweden, Holland, Germany, Austria and Switzerland. The entire family visited California with all of its tourist attractions. Lee Ann is the oldest at 14, Bryan is in 6th grade, Barry is next in line, Bradley is in first grade and Lisa is 4 years old and disappointed that she is the only one who has to stay home.

Janice Hemmer Mattson and her husband Carl have worked hard on the alcohol fuel problem, travelling in a convoy to Washington, D. C. and New York City, lobbying and disseminating information about ethanol. Farm work takes up the rest of their time

Shirley Sorenson McBride and family have returned to the U.S. after a tour of duty in western Australia. They thoroughly enjoyed their stay "down under" and took advantage of every opportunity to travel, visiting sheep stations, snorking in the Indian Ocean, taking a trip to New Zealand and seeing more than I can possibly recount here. They are now in Stockton, California where Jeff, a first grader, and Kristie, in third grade, have quickly made the adjustments needed when switching from one country to another.

Anna Jeanne Sockness Stewart and her husband Russ have embarked on a brand-new adventure after Russ had retired from the postal service. They now own and run a Kentucky Fried Chicken place and are enjoying all the new contacts they are making. Two of their daughters are married and the other two are in college.

Joan McCracken is still enjoying her work as counselor at Sentinel High School. Family reunions, short trips and long trips, some educational and some just for relaxation filled her summer.

Carolee Slotsve Hathaway is returning to school for a second degree in health education. Her husband, Don, has completed his master's degree in business administration. Jeff is their 15 year old who is eating them out of house and home and Leann is in third grade.

Shirley Westlund is still in Minnesota and doing well. She is envious of the new women's athletic program and wishes she could roll time back 25 years so that she might participate in it.

Pat Cubbage Baker is teaching business courses and she and her husband enjoy their two teenaged boys, both of whom were in football. Now Bo is playing basketball and Dirk is on the wrestling team.

Jaque Spaulding's gymnastics team is keeping her on her toes during the school year, but the summer gives her time for backpacking and canoeing. A hike into the Beartooth Mountains proved particularly enjoyable, backpacking and camping among gorgeous scenery.

Helyn McGown is thoroughly happy in her retired state! She is doing some lovely pieces of bronze sculpture, has completed an eagle and Canada goose, and is working on another piece. Gardening in the summer, rooting for the Bronco's in the fall and skiing in the winter are only a few of her activities.

Mary Husemann spent Christmas vacation in Laguna Beach and loved the beach and the ocean. Where are you now, Mary?

Etta Webb Dettman has had to curtail her outside activities a little in order to keep track of four year old Mack and Katie who is just learning to walk, but she still bowls and plays basketball. During the canning season, she puts up 600 quarts of canned goods! Nobody will go hungry in that household.

Marilyn Smith McAtee and husband Bill are still happily living in California and justly proud of their family. The children are either in college or have graduated so the tempo has slowed down a little in the family home.

Jeanne Dolliver Kildahl and Marv have changed very little. Dollie is teaching in the elementary grade and Marv is a principal. They were in Bozeman for a football game last fall and I had the pleasure of seeing them at that time along with their son who is attending MSU.

JoAnn Long is still in Germany and enjoying the continent as much as ever. She came back to Livingston for the summer, promising herself a good loafing time, but found herself as busy as ever. It was good to see you, Little Jo!

Erlice Killorn has retired from coaching and is now able to spend all of her time on teaching, which she is enjoying very much. Coaching takes a tremendous amount of time and energy.

John McLellan and Marie are still in Texas, Big Mac at Trinity and Marie teaching math to 6th and 7th graders. Their family of four boys is mostly grown, Mike an accountant in Houston, Pat in graduate school at Illinois, Dan in graduate school at University of Texas, Austin, and Neil a sophomore at San Antonio College.

Janice Hanson Storm is still teaching part-time in Health and Physical Education in Great Falls. She coaches junior high gymnastics, a challenge indeed. Her little third-grade girl participated in a basketball program, which Jan viewed with skepticism, but which turned out to be a well-conducted program. Tom loved it!

Cecilia Kiefer is still very busy working in Montana Hall and keeping up with her bowling. All is going well for her.

Nancy Walters is very happy in her teaching and coaching in Great Falls. She is also quite successful with it and building up a good reputation.

Bonnie Sherrif is still teaching and coaching at Western Montana College. Her spare time is taken up with hunting and fishing and exploring the backcountry.

Carol Peterson Burke taught at Fresno State and had a very successful swimming team. It was only a one-year position, so now she is working in the X-ray department at St. Agnes Hospital and has completed emergency medical training.

Viola Evans Shellenberg has had two total hip replacements and is most grateful that she can once again walk without a limp or cane and without pain. Am so pleased for you, Vi!

Willa Nies is very happy with her teaching situation, teaches five classes, coaches volleyball and basketball, has no problems with the coach and all is going well. Her father's family had a reunion of 178 people for three days last summer. Can you imagine that?? A wonderful time was had by all!

Myles Humphrey, head of Physical Education and Athletics at Western Montana College manages to keep very busy with his job and improving his home. What spare time he has is spent with his Great Dane and her litter of 8 puppies. Can't you just see eight Great Danes at feeding time?

Patti Wetzel, with her cat and dog, is having a great time. She enjoys her teaching and her home and is the new president-elect for MAHPER. Congratulations, Patti, on many things!

Judi and Ray Harris have moved from Lodge Grass to Simms where Ray teaches and is wrestling coach, and Judi does substitute teaching. They have installed a trailer home and very much enjoy being in Simms. They have three active youngsters; Todd is eight, Tammy is seven and Scott is a toddler. All is going well for them!

Kim Miller, who has been in the Air Force ever since graduated, attended another Air Force school. His wife Nancy (Nelson) is now the director of a Women's Medical Clinic. Both enjoy their work very much. Their 14 year old son has shot up to an unbelievable 6'1".

Beverly Doherty and her husband moved to Florida to attend Bible school. Now Bev is teaching P.E. and coaching volleyball, basketball and softball in the high school plus coaching the same three sports at the college while attending some Bible classes.

Caroline Stuzky Phillips and her husband Ted are very happy in their secluded Jocko Canyon. Susan is a senior, getting ready to go to college, while Paula is a senior at U.M. Dave is taking environmental engineering at Mont. Tech. To keep from feeling as though they wre getting old, Caroline and Ted bought 10-sneed bikes and pedalled to Pueblo, Colorado, crossing the Continental Divide three times. That should prove something!

Shirley Weaver is coaching gymnastics and teaching in Great Falls. She has been attending graduate school during the summer in Bozeman and is nearing completion of her requirements for her master's in P.E. In her spare time she runs and runs and runs and doing well in competition. Her little girl, Monica, can't quite keep up with her but shows great promise.

Sue Janssen Feeney and husband Bob received a very special Christmas gift, a baby girl they have named Dana. They are still living in Medicine Hat and very happy.

Marilyn Milburn Asbridge and Jack have seen two of their girls through college and another one is attending New Mexico State. She likes all the outdoor, active sports. Gary played high school football, and Joe, a young third grader, likes Cub Scouts and piano. Marilyn is hoping to accompany Jack on his next business trip to Europe. She has been working as a temporary aide at the high school.

Delores Brown Kropf is doing some substitute teaching now that her little girl is a pre-schooler and the boy a happy first grader. Both are taking swimming lessons. Husband Joe got drafted to coach a soccer team and De is his "technical advisor." Help would be greatly appreciated from anyone who cares to write a book on the subject!

Virginia Yankoski is still enjoying her job in Portland, where she is in charge of girls' physical education and athletics for the entire city. It is a very challenging position, but she does miss the contact with the students. Ginny keeps in shape by participating in all types of sports, notably golf and skiing.

Judy Gleason finds her weeks, including weekends, filled with work as athletic director at Capitol High in Helena. She attends all girls' and boys' athletic events which she can possibly fit into her schedule. Her days are long, but she enjoys her work and the students.

Ann Courtney Brandenburg was married this summer. She assists in the intramural recreation department under Dobbie Lambert's direction. She adds much to the program.

Barbara Crowe Bailly works in the intramural program here on campus. Her little daughter is with her and attends school while Barb is at work. In her spare time, Barb runs and is interested in marathon running. She adds a bright note to the department.

DeeAnna Brady Stalnaker teaches at Carroll College and was the convention manager for the MAHPER convention this fall. I only caught glimpses of her as she moved quickly down the halls.

Dianne Samuelson Cromer teaches in Helena and enjoys it very much. She frequently acts as classroom supervisor for some of our student teachers and helps them over the rough spots.

Wendy Burns Kautz was married last summer and has forsaken Polsen for Missoula. Good Luck to you, Wendy!

MONTANA STATE UNIVERSITY

DEPARTMENT OF HEALTH, PHYSICAL EDUCATION AND RECREATION

The 3rd Annual Montana Outdoor Recreation Education Workshop will be held June 11-15 at Camp Luccock, 15 miles south of Livingston.
The Workshop will give the participants sufficient proficiency in two areas to enable them to teach these skills. The subjects this year are orienteering, survival skills, backpacking and environmental education. Trap and skeet instruction will be a bonus offered in the evening to those interested.
The price for 5 days lodging, food, instruction, all materials and two graduate credits (590) will be in the neighborhood of $115.
This workshop is being co-sponsored by the Dept. of Health, Physical Education and Recreation, MSU, Montana Office of Public Instruction and Continuing Education, MSU, with assistance from Montana Fish and Game.
For further information, contact Curt Shirer, Recreation Coordinator.
